Professor Joshua Lederberg  
School of Medicine  
Department of Genetics  
Stanford University  
Palo Alto, California

Dear Joshua:

Thank you very much for the reprints which are very interesting indeed.

I talked to Cy Leventhal, and was very pleased to learn that he has made great progress on the simulated molecular models. Since my ideas are a bit different from his, we will proceed independently, at least during the first stages.

Best wishes.

Cordially,

Joseph O. Hirschfelder
